Guide to App Design

App designers are in charge of making an app look good, while developers make it work correctly. Mobile app design encompasses both the user interface (UI) and user experience (UX). Computers and software applications available in the Spark! Digital Media Lab can be used to learn the basics of app design & development.

Lab resources:

Software
Adobe Creative Cloud including:
  » Adobe XD, a vector-based user experience design tool.

The lab is outfitted with 4 Mac and 4 PC desktops. Most software is available on all desktops.
